

MARS Standard Edition

The grid below shows the main functionalities which are available in the standard edition. Not all functionality is listed. ✓ indicates that the functionality is included as standard. If you do not find the functionality you require in the Additional Functionality list in the web store but you have used it in the Evaluation Edition, then you can safely assume that it is included as standard.

Don't hesitate to contact us at <http://www.christiansteven.com/contacts.html> if you have any questions.
